

Dear Neighbors,

The Alliance for Sensible Airspace Planning represents the chief elected officials and residents from Bridgewater, Danbury, Darien, Greenwich, New Canaan, Norwalk, Redding, Ridgefield, Stamford, Weston, Westport, and Wilton in Connecticut and Pound Ridge in New York who have joined forces to oppose the Federal Aviation Administration's (FAA's) airspace redesign proposal.

The FAA Failed to Follow Appropriate Due Process. The FAA violated the fundamental federal charter governing environmental review, as well as its own environmental review procedures. The end product of that flawed process was an environmental impact statement (EIS) that improperly shrugged off the impact of increased noise from the airspace redesign on residents and on citizens' ability to enjoy the region's parks and nature preserves.

The Current FAA Plan Will Increase Air Traffic and Amplify Noise Pollution. The FAA's plan raises serious, legitimate concerns about the safety of our communities, the impact on our environment, and the harm to our quality of life. The plan will increase air and noise pollution in dozens of communities across CT, NY, NJ, and PA, affecting as many as 29 million people.

The FAA Plan is NOT a Real Solution to the Problem of Flight Delays in this Region. The FAA airspace redesign does not address the most significant root causes of flight delays in our area. Any solution to the problem of flight delays needs to address the fact that air traffic control procedures are responsible for only a small fraction of delays.

Help Us Keep Our Skies and Our Communities Safe. Many towns along with the State of Connecticut have given generously to support our efforts. Their support has helped us file a lawsuit against the FAA and support community-level efforts to stop this dangerous plan in its tracks. Now we need your help. Please join us by contributing to this important effort.
